

Introducing The SmartGEDi Light Saver...

Optimising your floodlighting systems and reducing your energy bills.

We are the UK's only approved SmartGEDi installer for floodlighting. The SmartGEDi intelligent control solution for floodlighting ensures your energy costs are kept to a minimum and maximum savings are achieved.

Its smart connectivity delivers precision control via an online app enabling you to programme multiple lighting scenes for all your floodlighting needs.

Retrofit
New Installation

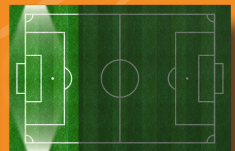

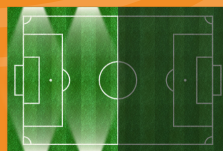

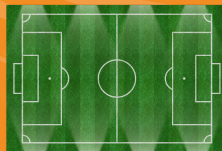

Sports & Leisure

By using sensor detection, lux level controls and the ability to compliment natural light, the SmartGEDi Light Saver is designed to optimise energy usage and reduce bills at all sporting venues. From national stadiums to grassroots clubs. SmartGEDi is suitable for all types of sports including:

Rugby | Football | Tennis | Hockey | MUGA (multi-use games area) | Plus more...

SmartGEDi can also provide multiple switching options for reduced pitch usage (e.g. half pitch and third pitch) and reduced lighting lux levels for training.

Save up to
85%
on your
energy bills*

Key features

- Reducing energy costs
- Reduced pitch lighting options
- Multi-lux levels available for training periods
- Ability to complement natural lighting (daylight optimisation)
- Reduces light pollution and overspilling
- Creates the perfect ambience for sporting play and enjoyment
